Lamellar UV
eye protection
**sensitive skin •
non-comedogenic**
with antioxidants
and Myralys

GB Advanced combination of lamellar SPF30 broad spectrum protection with Myralys, a natural extract from the root of the yellow gentian. Restores optimal moisture levels, reduces the appearance of sun-induced lines, wrinkles and dark circles around the eye area. Helps to protect the skin from infrared radiation and blue light. Features incredibly fast-absorbing, lightweight and non-greasy textures. Suitable for the delicate eye area - use under the eyes and over the eyelid.

EcoSun Pass
approved.

EcoSun Pass is either a registered trademark or a trademark of BASF SE in the European Union and/or other countries.

- water resistant
- fragrance-free
- helps to prevent sun allergies*

Ingredients: Aqua, Dibutyl Adipate, Diisopropyl Sebacate, Pentylene Glycol, Ethylhexyl Triazone, Coco-Caprylate/Caprate, Dicapryl Pentaoxytrimethyl Siloxane, Carotene, Diethylamino Hydroxybenzoyl Hexyl Benzoate, C12-15 Alkyl Benzoate, Glycine, Bis-Ethylhexyloxyphenyl Methoxyphenyl Triazone, Potassium Cetyl Phosphate, Polyglyceryl-3 Stearate/Sebacate, Methylene Bis-Benzotriazolyl Tetramethylbutylphenol (Nano), Silica, Propylheptyl Caprylate, Acrylates Copolymer, Hydrogenated Phosphorylcholine, 1,2-Hexanediol, Hydroxyacetophenone, Hydrogenated Castor Oil, Arginine, Phenoxymethyl Caprylate, Caprylic/Capric Triglyceride, Cocoglycerides, Decyl Glucoside, Titanium Dioxide, Propylendiol, Cetyl Alcohol, Xanthophylls, Gentiana Lutea Root Extract, Propylene Glycol, Xanthan Gum, Tocopherol.

Protection UV lamellaire
pour le contour des yeux
**peau sensible •
non comédogène**

DE Spezielle Kombination von lamellarem SPF30 Breitband-Schutz mit Myralys, einem natürlichen Extrakt aus der Wurzel des gelben Enzians. Reduziert die Erscheinung von sonnenbedingten Linien, Falten und dunklen Kreisen unter den Augen. Trägt zum Schutz der Haut vor Infrarot-Strahlung und blauem Licht bei. Für optimale Feuchtigkeit. Sehr schnell absorbierende, äusserst leichte und nicht fettige Textur. Geeignet für die empfindliche Augenpartie - unter den Augen und auf dem Augenlid anwenden.

FR Formulation avancée combinant une protection lamellaire à large spectre SPF 30 avec Myralys, un extrait naturel de la racine de la gentiane jaune. Réduit l'apparence des rides, ridules et cercles sombres sous les yeux dus au soleil. Contribue à protéger la peau des rayons infrarouges et de la lumière bleue. Pour une hydratation optimale. Texture très rapidement absorbée, extrêmement légère et non grasse. Convient à la zone délicate des yeux - à utiliser sous les yeux et sur la paupière.

IT È la soluzione avanzata che abbina la protezione lamellare a largo spettro SPF30 con Myralys, un estratto naturale della radice della genziana gialla. Riduce la comparsa di linee, rughe e occhiaie indotte dal sole. Aiuta a proteggere la pelle dai raggi infrarossi e dalla luce blu. Per un'idratazione ottimale. Ha una consistenza incredibilmente leggera, non grassa e si assorbe rapidamente. Adatto alla zona delicata del contorno occhi - da usare sotto gli occhi e sulla palpebra.

- wasserfest | résistant à l'eau
- ohne Parfum | sans parfum
- ideal bei Sonnenallergie*
idéale contre les allergies solaires*

Application recommendation

Carefully apply a small amount of cream around the eye contour and gently pat in with your finger until fully absorbed.

Ultrason Sun Account

Maximum recommended sun exposure time per day based on your skin type, sun intensity and sufficient application:

		SPF 30			
		Skin's natural self protection time	Calculated maximum exposure time	Safety reduction*	Maximum recommended exposure time
Phototype 1 Light / Pale White	Normal sun	10 min	5h	-30%	3h 30 min
	Extreme sun	3 min	1 h 30 min		1 h 03 min
Phototype 2 White / Fair	Normal sun	20 min	10 h	-30%	7 h
	Extreme sun	10 min	5 h		3h 30 min
Phototype 3 Medium / White to Olive	Normal sun	30 min	10 h+	-30%	7 h+
	Extreme sun	20 min	10 h		7 h
Phototype 4 Olive / Medium Brown	Normal sun	45 min	10 h+	-30%	7 h+
	Extreme sun	30 min	10 h+		7 h+
Phototype 5 Brown / Dark Brown	Normal sun	60 min	10 h+	-30%	7 h+
	Extreme sun	45 min	10 h+		7 h+
Phototype 6 Black / Very Dark Brown to Black	Normal sun	90 min	10 h+	-30%	7 h+
	Extreme sun	60 min	10 h+		7 h+

**Repeated activity such as swimming, perspiring or towel drying can reduce your protection time. Please use this table as a guide only.*

GB Always apply a generous amount of sun protection 15 to 30 minutes before sun exposure. Applying too little will significantly reduce the level of protection. Even sun protection products with a high SPF do not offer full protection. Avoid midday sun. One application may be sufficient but please reapply, especially after intense sweating and towel drying. Avoid contact with clothing as it may stain. Suitable for the sensitive eye area.

DE Sonnenschutz immer 15 bis 30 Minuten vor der Sonnenexposition grosszügig auftragen. Zu gering aufgetragene Mengen reduzieren die Schutzleistung markant. Auch Sonnenschutzprodukte mit hohem Lichtschutzfaktor bieten keinen vollständigen Schutz. Intensive Mittagssonne meiden. Eine Anwendung kann ausreichen. Insbesondere nach intensivem Schwitzen und Abtrocknen mit dem Handtuch, wiederholt auftragen. Kontakt mit der Kleidung vermeiden – kann abfärben. Geeignet für die empfindliche Augenpartie. Eine kleine Menge der Creme vorsichtig oberhalb und unterhalb der Augenpartie auftragen und sanft mit dem Finger eintupfen.

FR Appliquez toujours une quantité généreuse de protection solaire 15 à 30 minutes avant l'exposition au soleil. Une quantité trop faible réduit considérablement l'efficacité de la protection. Même les produits de protection solaire avec un indice de protection élevé n'offrent pas une protection complète. Éviter le soleil intense de midi. Une seule application peut suffire. En particulier après avoir transpiré intensément et s'être essuyé avec une serviette, répéter l'application. Éviter le contact avec les vêtements - peut déteindre. Convient pour le contour sensible des yeux. Appliquer délicatement une petite quantité de crème au-dessus et en dessous du contour des yeux et tamponner doucement avec le doigt.

IT Applicare la protezione solare abbondantemente 15-30 minuti prima dell'esposizione al sole. Piccole quantità di prodotto riducono significativamente il livello di protezione. Anche le creme solari con indice di protezione molto alto non assicurano una protezione completa. Evitare il sole di mezzogiorno. Si consiglia di riapplicare il prodotto in caso di elevata traspirazione o dopo essersi asciugati. Evitare il contatto con i vestiti: il prodotto potrebbe macchiare. Adatto alla zona delicata del contorno occhi. Applicare con cura una piccola quantità di crema sopra e sotto il contorno occhi e tamponare delicatamente con l'anulare.
