

Ultrasun Sun Account

Maximum recommended sun exposure time per day based on your skin type, sun intensity, and sufficient application.

		SPF 50+			
		Skin's natural self protection time	Calculated maximum exposure time	Safety reduction*	Maximum recommended exposure time
Phototype 1 Light / Pale White	Normal sun	10 min	10 h	-30%	7 h
	Extreme sun	3 min	3 h		2 h 06 min
Phototype 2 White / Fair	Normal sun	20 min	10 h+	-30%	7 h+
	Extreme sun	10 min	10 h		7 h
Phototype 3 Medium / White to Olive	Normal sun	30 min	10 h+	-30%	7 h+
	Extreme sun	20 min	10 h+		7 h
Phototype 4 Olive / Medium Brown	Normal sun	45 min	10 h+	-30%	7 h+
	Extreme sun	30 min	10 h+		7 h
Phototype 5 Brown / Dark Brown	Normal sun	60 min	10 h+	-30%	7 h+
	Extreme sun	45 min	10 h+		7 h
Phototype 6 Black / Very Dark Brown to Black	Normal sun	90 min	10 h+	-30%	7 h+
	Extreme sun	60 min	10 h+		7 h

*Repeated activity such as swimming, perspiring or towel drying can reduce your protection time. Please use this table as a guide only.

GB Always apply sun protection generously, 15 to 30 minutes before sun exposure. Any less, radically reduces the protection effect. Even sun protection with high SPF does not grant full protection. Keep babies and young children out of direct sunlight and protect them with a high sun protection factor (\geq SPF30) and appropriate clothing. Avoid midday sun. Generally one application is sufficient but consider another application after extensive sweating, swimming or towel drying. Avoid contact with clothing as direct contact may stain. Avoid contact with the eyes.

DE Sonnenschutz immer 15 bis 30 Minuten vor der Sonnenexposition großzügig auftragen. Zu gering aufgetragene Mengen reduzieren die Schutzeistung markant. Auch Sonnenschutzprodukte mit hohem Lichtschutzfaktor bieten keinen vollständigen Schutz. Babys und Kleinkinder vor direkter Sonneneinstrahlung schützen und gleichzeitig schützende Kleidung sowie Sonnenschutzmittel mit hohem Lichtschutzfaktor (\geq SPF30) verwenden. Intensive Mittagssonne meiden. Eine Anwendung kann gemäß Ihrem persönlichen Sonnenkontos reichen. Wiederholt auftragen, insbesondere nach intensivem Schwitzen, dem Aufenthalt im Wasser und Abtrocknen. Kontakt mit der Kleidung vermeiden – kann abfärben. Augenkontakt vermeiden.

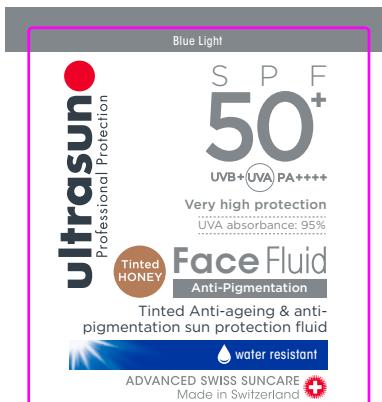

FR Toujours appliquer une couche généreuse de protection solaire 15 à 30 minutes avant l'exposition. Une application insuffisante réduit considérablement l'effet protecteur. Attention, même les crèmes solaires d'indice de protection élevé ne garantissent pas une protection totale. Les bébés et les jeunes enfants ne doivent pas être exposés directement au soleil. Il est important de les protéger avec un indice de protection solaire élevé (\geq SPF30) et des vêtements adaptés. Éviter le soleil de midi.

Application recommendation

Apply 1 finger of UV/sun protection on your face.
Apply additionally 1 finger of UV/sun protection on your neck and ears.

NL UV-bescherming altijd rijkelijk aanbrengen, 15 tot 30 minuten voor blootstelling aan de zon. Minder grondig toepassen verlaagt de beschermende werking. Zelfs zonnecremes met hoge SPF bieden geen volledige bescherming. Baby's en jonge kinderen niet blootstellen aan direct zonlicht en ze beschermen met een hoge zonnefactor (\geq SPF30) en geschikte kleding. Vermijd de middagzon. Doorgaans is een keer aanbrengen voldoende maar breng nogmaals aan na veel transpireren, zwemmen of afdrogen met de handdoek. Vermijd contact met kleding aangezien direct contact vlekken kan veroorzaken. Vermijd contact met de ogen.

GB Always apply sun protection generously, 15 to 30 minutes before sun exposure. Any less, radically reduces the protection effect. Even sun protection with high SPF does not grant full protection. Keep babies and young children out of direct sunlight and protect them with a high sun protection factor (\geq SPF30) and appropriate clothing. Avoid midday sun. Generally one application is sufficient but consider another application after extensive sweating, swimming or towel drying. Avoid contact with clothing as direct contact may stain. Avoid contact with the eyes.

IT Applicare la protezione solare abbondantemente 15-30 minuti prima dell'esposizione al sole. Più tardi, riduce il potere protettivo. Soprattutto il sole di mezzogiorno. Anche le crema solari con indice di protezione molto alto non assicurano una protezione completa. Evitare di esporre neonati e bambini alla luce diretta del sole e proteggerli con un fattore di protezione solare elevato ($>$ SPF30) e con un abbigliamento adeguato. Evitare il sole di mezzogiorno. Di norma un'applicazione è sufficiente, si consiglia tuttavia di riapplicare il prodotto specialmente in casi di elevata traspirazione, bagno in mare o in piscina o dopo l'uso dell'asciugamano. Evitare il contatto con i vestiti: il prodotto potrebbe macchiare. Evitare il contatto con gli occhi.
