DIRECTIONS:

- 1 Add water to the bowl no higher than the maximum fill line. Use the remote control to adjust the water to your preferred temperature.
- 2 Ensure the Foot Spa is placed on a level surface, close to an electrical plug point in front of a comfortable chair. Once comfortably seated use remote control to start your spa therapy.
- 3 Gently place your feet into the bowl and select your desired therapeutic functions. If you would like to enhance your treatment with the Rewining Foot Soak or ThermaSulis™ Bath Salts, now is the time to add them.
- 4 Finally, sit back, relax, and let the swirling warm water delight your mind, body and soul. Use regularly for relaxation and to maintain the treatment benefits.
- 5 When you have completed your treatment, simply place the foot spa in to your bath or shower tray and lift the plug to release the water.
