A True Beauty Ritual

Get the most from your  
Pro-Intense Hyaluronic Acid Illuminating Day Cream

1. The jaw - Apply the moisturiser, working from the chin towards the cheeks.
2. The cheeks - Smooth from nose to temples.
3. The forehead - Massage, making smoothing movements from the centre of the forehead.
4. The facial folds - Massage, making circular movements from eyebrows to nose.

• **Avant Tips:** When applying your moisturiser, try to adopt a dab and tap rhythm. Parting your face softly will stimulate the circulation, wake up the complexion and can work to flush out any toxins that are built up in your lymphatics.

Always carry out a 24 hour patch test before the first use. Store in a cool and dry place.

Sunburn Alert: This product contains an alpha hydroxy acid (AHA) that may increase your skin's sensitivity to the sun and particularly the possibility of sunburn. Use sunscreens, wear protective clothing, and limit sun exposure while using this product and for a week afterwards.
