A True Beauty Ritual

Getting the most from your R.N.A Radical Firmness Anti-Ageing Serum

1. For maximum absorption, cleanse your face with tepid water before applying your serum.
2. Press serum into skin with an open palm instead of fingertips to release active ingredients.
3. Wait 2 to 3 minutes to allow serum to fully absorb before moisturising.

#Avant Tips: When cleansing your face before applying serum, use tepid water. Hot water could make your skin perspire which inhibits absorption and cold water will close pores, blocking the serum's effectiveness.

Always carry out a 24 hour patch test before the first use.

Store in a cool and dry place.

Sunburn Alert: This product contains an alpha hydroxy acid (AHA) that may increase your skin's sensitivity to the sun and particularly the possibility of sunburn. Use sunscreen, wear protective clothing, and limit sun exposure while using this product and for a week afterwards.
