A True Beauty Ritual
Getting the most from your Full Neck Tightening & Firming Treatment
1. Begin by warming a pea-size amount of the cream between your fingertips, spreading across the palms and over fingers.
2. Apply to the neck, spreading all over the skin with your fingertips, using upwards motions until the product has partially absorbed into the skin.
3. Using flat fingers, follow the neck contour and massage the neck with sweeping and lifting motions. Use alternate hands and sweep upwards to the jawline moving slowly from left to the right.
4. To finish your neck cream application, take three deep breaths in through the nose and exhale through the mouth.
Avant Tips: Gently tilt your head backwards and hold this position for three seconds. This movement will lengthen and stretch the neck muscles. Finish the stretch by slowly tilting your head back down to its natural position.
Always carry out a 24 hour patch test before the first use. Store in a cool and dry place.
