

### Application recommendation

Carefully apply a small amount of cream around the eye contour and gently pat in with your finger until fully absorbed.

### Ultrason Sun Account

Maximum recommended sun exposure time per day based on your skin type, sun intensity, and sufficient application:

		SPF 30			
		Skin's natural self protection time	Calculated maximum exposure time	Safety reduction*	Maximum recommended exposure time
<b>Phototype 1</b> Light / Pale White	Normal sun	10 min	5 h		3h 30 min
	Extreme sun	3 min	1h 30 min	-30%	1h 03 min
<b>Phototype 2</b> White / Fair	Normal sun	20 min	10 h		7h
	Extreme sun	10 min	5 h	-30%	3h 30 min
<b>Phototype 3</b> Medium / White to olive	Normal sun	30 min	10h+		7h+
	Extreme sun	20 min	10 h	-30%	7h
<b>Phototype 4</b> Olive / Medium Brown	Normal sun	45 min	10h+		7h+
	Extreme sun	30 min	10h+	-30%	7h+
<b>Phototype 5</b> Brown / Dark Brown	Normal sun	60 min	10h+		7h+
	Extreme sun	45 min	10h+	-30%	7h+
<b>Phototype 6</b> Black / Very Dark Brown to Black	Normal sun	90 min	10h+		7h+
	Extreme sun	60 min	10h+	-30%	7h+

\* Repeated activity such as perspiring or drying can reduce your protection time. Please use this table as a guide only.

**GB** Always apply a generous amount of sun protection 15 to 30 minutes before sun exposure. Applying too little will significantly reduce the level of protection. Even sun protection products with a high SPF do not offer full protection. Avoid midday sun. One application may be sufficient but please reapply, especially after intense sweating and towel drying. Avoid contact with clothing as it may stain. Suitable for the sensitive eye area.

**DE** Sonnenschutz immer 15 bis 30 Minuten vor der Sonneneexposition großzügig auftragen. Zu gering aufgetragene Mengen reduzieren die Schutzleistung merkant. Auch Sonnenschutzprodukte mit hohem Lichtschutzfaktor bieten keinen vollständigen Schutz. Intensive Mittagssonne meiden. Eine Anwendung kann ausreichen. Insbesondere nach intensivem Schwitzen und Abtrocknen mit dem Handtuch, wiederholt auftragen. Kontakt mit der Kleidung vermeiden – kann abfärben. Geeignet für die empfindliche Augenpartie. Eine kleine Menge der Creme vorsichtig oberhalb und unterhalb der Augenpartie auftragen und sanft mit dem Finger einlupten.

**FR** Appliquez toujours une quantité généreuse de protection solaire 15 à 30 minutes avant l'exposition au soleil. Une quantité trop faible réduit considérablement l'efficacité de la protection. Même les produits de protection solaire avec un indice de protection élevé n'offrent pas une protection complète. Éviter le soleil intense de midi. Une seule application peut suffire. En particulier après avoir transpiré intensément et s'être essuyé avec une serviette, répéter l'application. Éviter le contact avec les vêtements - peut déteindre. Convient pour le contour sensible des yeux. Appliquer délicatement une petite quantité de crème au-dessus et en dessous du contour des yeux et tamponner doucement avec le doigt.

**IT** Applicare la protezione solare abbondantemente 15-30 minuti prima dell'esposizione al sole. Piccole quantità di prodotto riducono significativamente il livello di protezione. Anche le creme solari con indice di protezione molto alto non assicurano una protezione completa. Evitare il sole di mezzogiorno. Si consiglia di riapplicare il prodotto in caso di elevata traspirazione o dopo essersi asciugati. Evitare il contatto con i vestiti: il prodotto potrebbe macchiare. Adatto alla zona delicata del contorno occhi. Applicare con cura una piccola quantità di crema sopra e sotto il contorno occhi e tamponare delicatamente con l'anulare.
